a
Finite bath and finite-band reference
Excited-state population
Time, t
P_{256}
P_W (quadrature)
P_M
b
Separating two error mechanisms
Absolute population difference
Time, t
$|P_W - P_M|$
$|P_{256} - P_W|$
c
Weighted cutoff-amplitude bound
Amplitude error / bound
Time, t
$|c - c_c|$
Integrated actual residual
Integrated piecewise bound
d
Certification versus observed error
Population error / bound
Time, t
$|P_{256} - P_M|$
Bound incl. rate mismatch
5% tolerance
